SUMMARY

As a Software Engineering student, I approach problems with a multidisciplinary mindset. I have hands-on experience in object-oriented programming and database management, and I aim to build a career in technology with a strong foundation in backend development.

PROJECTS

E-commerce Project, Phoenixia Soft (work with friends) May 2025 - Ongoing

- developed an e-commerce application using **Spring Boot**, **JPA**, and **Hibernate ORM**
- implemented **DTOs** for efficient and clean data transfer between layers
- designed secure **RESTful APIs** following **SOLID** principles
- applied **MVC** architecture to build scalable and maintainable code
- integrated **MySQL** for reliable data persistence and tested endpoints with **Postman**

Test-Framework Project, School Project April 2025 - May 2025

- developed a Java application for the Design Principles course using SOLID principles
- used design patterns such as **Singleton**, **Command**, **Composite**, **Facade**, **Factory**, and **Iterator**
- built the project with object-oriented programming to make it easy to update and expand
- kept the code simple and well-organized for better readability and maintenance

To-Do App Project September 2025 - September 2025

- developed a Todo application backend using **Spring Boot**
- implemented **JWT-based authentication** & authorization for security
- built **CRUD** operations for task and project management using RESTful standards

EDUCATION

Bachelor of Science in Software Engineering Sep 2022-May 2026

Izmir University of Economics

- **GPA: 3.24**

ADDITIONAL INFORMATION

- **Programming Languages:** Java(advanced), Spring Boot, Python, Dart
- **Software Development:** Agile methodologies, version control (Git), SOLID, REST API
- **Database Management:** SQL, MySQL, PostgreSQL
- **Languages:** English(Upper Intermediate), Turkish
- **Certifications:** Environmental Impacts of AI Systems, Energy-Efficient Software Development

VOLUNTEERING

President of Social Responsibility Club - Izmir University of Economics - 2024 to present

- team management, organization, project planning, social responsibility, collaboration
